## Post-traumatic Stress Disorder Checklist (PCL)

Post-traumatic Stress Disorder (PTSD) is a mental health condition that can occur after a person has experienced or witnessed a traumatic event. It can cause a range of symptoms, including flashbacks, nightmares, difficulty sleeping, and feeling emotionally numb. The Post-traumatic Stress Disorder Checklist (PCL) is a tool used to assess the severity of PTSD symptoms.

The PCL is a self-report questionnaire that consists of 17 items. Each item is rated on a 5-point scale, ranging from 0 (not at all) to 4 (extremely). The items are divided into three subscales: re-experiencing, avoidance, and hyperarousal. The total score is calculated by summing the scores for each item. A score of 50 or higher is considered to be indicative of PTSD.

The PCL is a useful tool for diagnosing PTSD, as it can help to identify individuals who may be at risk for developing the disorder. It can also be used to monitor the severity of symptoms over time, as well as to evaluate the effectiveness of treatment.

From a Christian perspective, it is important to remember that God is always with

---

us, even in the midst of our struggles. The Bible tells us that “God is our refuge and strength, an ever-present help in trouble” (Psalm 46:1). We can take comfort in knowing that God is with us and that He will never leave us or forsake us (Hebrews 13:5).

**Salvation Prayers** : Dear Lord Jesus, I come to you today acknowledging my need for salvation. I confess that I have sinned and fallen short of your glory. But I believe that you died for my sins and rose again. I ask that you come into my heart and be my Lord. I commit to following you and living for you every day. Thank you for your love and for the gift of eternal life. In your name I pray, Amen. **Amen** [If you prayed the above prayers kindly click here to get more information](https://www.xgospel.net/harvest_form/form/?page=0&salvation=true)
