Psychotic Disorders

Psychotic disorders are a group of mental illnesses that affect a person's ability to think, feel, and behave normally. People with psychotic disorders may experience hallucinations, delusions, disorganized thinking, and difficulty communicating with others.

The Bible speaks of mental illness in several passages, including the story of Jesus healing a man with an "unclean spirit" (Mark 5:1-20). In this story, Jesus shows compassion and understanding for the man's condition, and he is ultimately healed. This story serves as an example of how God can bring healing and hope to those suffering from mental illness.

Types of Psychotic Disorders

Schizophrenia

Schizophrenia is a chronic and severe mental disorder that affects how a person

thinks, feels, and behaves. People with schizophrenia may experience hallucinations, delusions, disorganized thinking, and difficulty communicating with others.

Schizoaffective Disorder

Schizoaffective disorder is a mental disorder that combines features of both schizophrenia and a mood disorder, such as depression or bipolar disorder. People with schizoaffective disorder may experience hallucinations, delusions, disorganized thinking, and difficulty communicating with others.

Brief Psychotic Disorder

Brief psychotic disorder is a mental disorder characterized by sudden and severe episodes of psychotic symptoms. These episodes typically last for less than one month and may include hallucinations, delusions, disorganized thinking, and difficulty communicating with others.

Delusional Disorder

Delusional disorder is a mental disorder characterized by the presence of one or more non-bizarre delusions. These delusions are fixed beliefs that are not based in reality and are not easily changed by logical argument or evidence to the contrary.

Catatonic Disorder

Catatonic disorder is a mental disorder characterized by periods of extreme immobility and unresponsiveness. People with catatonic disorder may also experience periods of extreme agitation and excitement.
